PROFESSIONAL SUMMARY

Junior Full Stack Developer specialized in Laravel, Livewire, and React JS, with hands-on experience in building admin panels, RESTful APIs, and dynamic web applications. Strong focus on clean code, validation, and practical problem-solving. Passionate about backend logic and interactive user interfaces.

PROJECTS

Online Marketplace System

- Developed backend using Laravel.
- Built dynamic admin panel using Livewire.
- Designed REST APIs for products, orders, and users.
- Merchant and delivery management system.
- Integrated React JS for frontend views.

Admin Panel – List Management System

- Built using Laravel + Livewire.
- Manage lists with up to 50 entries per list.
- Prevent duplicate entries with real-time validation.
- Bulk status updates for list entries.
- Clean and responsive UI.

School Management Dashboard

- Developed a full School Administration Dashboard using Laravel & Livewire.
- Student management (add, update, classify students).
- Teacher and staff management.
- Class, subjects, and schedules management.
- Attendance tracking system.
- Role-based access for admins and staff.
- Clean admin UI with real-time updates via Livewire
-
